

PRODUCT INFORMATION

C.L.A 1000

CONJUGATED LINOLEIC ACID 1000mg

BASIC FUNCTIONS

CLA (Conjugated Linoleic Acid) is a naturally occurring fatty acid that is present in kangaroo, beef, cheese and eggs. (types of food often excluded when restricting dietary intake). Mushroom is the main and rare vegetable source of CLA.

Gen-Tec's CLA is derived from safflower oil, a premium dietary source to produce one of the highest quality linoleic acids available.

Some studies suggest CLA useful when reducing adipose bodyfat while at the same time increasing lean muscle mass.

Importantly Gen-Tec's CLA contains active isomers (c-9, t-11) and (t-10,c-12) in equal ratio.

Each capsule supplies 1,000 mg of CLA. Easy-to-swallow softgel capsules. Suggested Use: Consume 1 CLA capsule with each major meal.

SIZES

Available in 90 and 180 softgel capsules

GEN-TEC
NUTRITION

100% Australian Owned and Manufactured. Gen-Tec sources the world's finest quality raw materials and use internationally recognised bio chemists to produce leading products that live up to my expectations!
